**Patient Start-Up Guide**

## Your CONNECTION to BETTER HEALTH

### Easy to use

Mydeltaregional allows easy viewing and navigation of your hospital electronic medical health record (EMR). Mydeltaregional enables you to view clinical information from your hospital health information 24/7 with internet access.

### You will be able to view:

- Allergies
- Immunizations
- Medications
- Certain lab results
- Clinical documents

### Convenient and secure

Mydeltaregional provides quick links to the Delta Regional Medical Center web site

[www.deltaregional.com](http://www.deltaregional.com)

This feature allows you to quickly search for a provider or gather additional information about services offered at Delta Regional Medical Center.

Mydeltaregional is HIPAA-compliant and offers security while viewing, storing, and sharing your health information.

### Communicate with your health care team

Mydeltaregional allows you to send secure e-mail message to physicians on your health care team who participate in Mydeltaregional. You can:

- Schedule, reschedule, or cancel an appointment
- Inquire about a medication refill
- Update personal information

### Sending a secure message

- 1.** Once logged into Mydeltaregional, click on **Email Your Provider** in the navigation bar on the left hand side of the screen.
- 2.** Click on **Send General Message**. If you are unable to find your provider, please check with your provider to see if they are participating in Mydeltaregional.
- 3.** To search for your provider, begin typing the provider's name in the To box.
- 4.** Type the details of your message in the box below.
- 5.** Click **Send**.
- 6.** Your provider or provider's office staff will e-mail or phone you with a response.
